# Educational Program

## About the Software

**Simple Geospatial Solutions** creates, sells and supports easy to use land surveying calculations software for HP graphing calculators. The **SGS Prime COGO** application for the *HP Prime Graphing Calculator* is well suited for classroom use, covering all the basic calculations typically seen in Geomatics courses, as well as some more advanced capabilities. The software is available in English, French, Spanish, Portuguese and German in three editions:

- Lite - \$50 CAD
- Standard - \$120 CAD
- Professional - \$210 CAD

Software feature descriptions: <https://sgss.ca/hpprime.html>

## About the Educational Program

Education is a big part of what **Simple Geospatial Solutions** is all about. We strive to make it easy for educational institutions to use our software in the classroom by offering the following discounts and incentives:

- Free software licenses for all instructors
- 50% discount on all software licenses for students
- Free technical support

## Getting Started

The software can be downloaded and installed at any time from our website, and a DEMO mode is available at no charge. Contact us to request an evaluation license, or to answer any questions you may have. We are flexible to work with specific needs and requirements.
